

# electrical designer 2010

## electrical designer 2010 new features

In this latest version as much emphasis has been placed on the programs internal structure as on new features, to help users enjoy increased productivity.

These are some of new features users will find in the new release electrical designer 2010, coming in the next quarter.

- ✓ Major **data base** engine rework in **SQL** (new up to date internal tools, new report options, without buying any dedicated server)
- ✓ 100% Unicode support for Chinese and Asiatic languages
- ✓ **Multi-user** new option within same project
- ✓ Projects and drawings import from XML files
- ✓ **DWF** creation with **intelligent navigation**
- ✓ **Red / Yellow visual comparison** in DWG
- ✓ Windows 7 OS certified and compatible
- ✓ .....

As usual our users with active subscription will be able to download free of charge the new release from our webpage, including SQL module included in electrical designer 2010.

**We will keep informed about new features, launch date, on-line presentations, training courses, etc.**
